

# Masimo Home Health Kit™

Automated hospital-grade measurement and data collection at home

Bring reliable medical-grade measurements from the hospital to the home with the Masimo Home Health Kit. Designed for patients with chronic and long-term conditions, as well as postoperative and recovering patients, the kit automates the collection of spot-check pulse oximetry, temperature, blood pressure, and weight measurements using intuitive devices and the Masimo SafetyNet App. Easily paired with the devices via Bluetooth®, the app transfers patient data to a secure cloud, where clinicians can access and analyze it using a web-based clinician portal—helping them spot which patients may need more follow up or even urgent intervention, wherever they are.

## Automate Patient Engagement

- > Digital care plan customized for each condition
- > Patient compliance tracked with care plans
- > Automatic daily patient check-in with symptom review
- > Measurements and health data seamlessly synchronized
- > Streamlined data sharing with family members and other care providers, at patient's discretion

## Scale-up Home Monitoring

- > Easily prioritize patients needing urgent attention
- > Receive timely notifications on clinician portal
- > Access accurate, timely patient data and trends
- > Monitor patient progress and recovery from afar

# Home Health Measurement Devices

## Masimo MightySat® Rx Fingertip Pulse Oximeter

Featuring Masimo SET® Measure-through Motion and Low Perfusion™ Pulse Oximetry

## Masimo TIR-1™

Non-contact, clinical-grade infrared spot check thermometer with Bluetooth®

## Omron® Blood Pressure Monitor

Featuring Advanced Accuracy Technology to provide precise blood pressure readings less affected by breathing or movement during measurement. Comes with a wide-range cuff suitable for arm circumferences from 9" to 17".

## Omron® Digital Weight Scale

Performs smart tracking of body weight up to 550 lbs.

## Custom Kits

The Home Health Kit is completely customizable based on patient needs. Customers can select any or all of the devices listed. Please see examples of kit combinations for different patient conditions below:

	Congestive Heart Failure (CHF)	End-stage Renal Disease (ESRD)	Vital Signs	Vital Signs with Weight
